

**“Committed to provide Customer Satisfaction by measuring customer perception”**

# CASE STUDY : TELECOM

The client has operations in around 180 countries and is the largest provider of fixed-line, broadband and mobile services, and also provides subscription television and IT services. They are one of the world's leading cyber security provider.

## THE REQUIREMENT

The customer wants to have security operation center to protect their own global infrastructure and its customers. It provides cyber security services including machine learning, data analytics and visualization, cloud computing, big data engineering and the full life cycle of software engineering.

**“Committed to provide Customer Satisfaction by measuring customer perception”**

## THE SOLUTION

Considering the above requirement, we provided virtualization solution with HPE Synergy Servers and 3PAR SAN Storage on VMware. HPE Synergy is the new composable platform that runs hybrid infrastructure with high operational efficiency. The servers and storage were placed in data center. This resulted in a very rigid and flexible solution in line with the requirements.

## SOLUTION BENEFITS

- Composable solution enabling faster automated provisioning
- Optimized for 24x7 operations
- Highly scalable as and when required
- Future ready solution
- Changes can be made online
- At par with SOC across the globe
- At par with SOC across the globe

**“Committed to provide Customer Satisfaction by measuring customer perception”**
